IT'S NOT HOW BIG THEY GET ... IT'S HOW THEY GET BIG!

At the moment we are hearing a lot of conversation about exotics. Those who promote the exotic cause, talk about the extra size incurred through the use of exotic bulls. Little is said about added calving problems, lack of fertility, limited feeder and packer acceptance.

Perry Oien, Kadoka, S.D., runs 100 Shorthorn cows that are mated to Shorthorn bulls. He also owns one half of a 200-head black herd that has been mated to an exotic breed that has been popular for some years.

Oien states, "Our Shorthorn calves returned \$50 per head more than our crossbreds." This extra return was due to higher per-pound value and to heavier weights. Because of extra Shorthorn virility, the straightbred calves had a higher average age than the crossbreds at weaning and an accompanying weight advantage. The milking ability of the Shorthorn cow was also a big help as was the Shorthorn advantage in calving percentage.

The South Dakota rancher reports that for several years, and his 1972 crop, his heifer calves are spoken for before they are born. **BROADEN YOUR MARKET AND YOUR PROFIT WITH "THE BEST IN EVERY WEIGH" ... BREED SHORTHORNS AND POLLED SHORTHORNS.**

STANDARD GUARANTEE

ENDORSED BY THE AMERICAN SHORTHORN ASSOCIATION

1. Proper care must be given by purchaser to protect breeding qualities and health of guaranteed animals.
2. All bulls are guaranteed breeders, provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd when under 20 months of age. In case of failure of a bull to be a breeder, notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.
3. With the exception of heifers sold under 14 months of age, all females are guaranteed breeders. Heifers under two years of age shall not be served by a heavy or old bull. Cows or heifers sold as bred, or safe in calf, not proving to be in calf must be reported to the seller within three months after date of sale. Females over 14 months of age sold open, not settling within six months after date of sale, shall be promptly reported to the seller. Cows with calves at foot even though bred are not given any guarantee.
4. When an animal fails to comply with the above guarantee the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. The expense of freight in such case is to be paid by the seller. If the animal is then proved to be a breeder beyond doubt it shall be returned to the purchaser at his expense. In case of dispute the return of the full purchase price without interest, to the buyer will be considered full settlement and satisfaction of all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any other animal later substituted.
5. In the event an animal is returned by the buyer to the seller as a non-breeder, the buyer must furnish to the seller a veterinarian's certificate showing that his herd is healthy if such certificate is required by the seller.
6. All animals are sold to comply with the laws regulating tuberculosis and Bang's disease of the state or country into which they may be shipped.
7. Certificates of registry and transfer will be furnished with each animal sold. A signed pedigree application for unborn calves should be furnished with bred females, showing names and record numbers of sire and dam, as well as service date.
